

Accu-Cut - MACHINE BENEFITS

IMPROVE MERCHANDISING

- Neatly and cleanly reverse roll remnants pile/pattern side out.
- Professionally merchandised remnants = increased sales.

CONTROL INVENTORY

- Proven measuring system will allow you to determine the exact amount of material on a roll before you sell a job and make any cuts.
- Cut, wrap and label all your cuts for a job in your warehouse.
- Bar code interface option to control and better track your inventory.

DECREASE LABOR COSTS

- One person can make all your cuts faster than two people cutting on the floor.
- An Accu-Cut can be operated simply and safely by any of your employees.
- Our machines always show up for work, require no benefits, and won't file workers compensation claims.

KEEP MATERIAL CLEAN

- Never again will you have to cut material in your customers' driveway or worry about getting the material dirty on the warehouse floor.
- You can easily wrap each of your cuts before you send them to the job.

REDUCE CLAIMS

- Inspect material on the cutting machine before it goes out the door.

EASILY MOVED

- All our machines are on caster wheels allowing them to easily be moved in your warehouse. Each machine includes a braking system that will keep the machine stationary when in use.
- An Accu-Cut machine will save you space by eliminating floor space that was previously reserved for cutting.

ON-SITE TRAINING

- Our skilled delivery technicians will set-up the machine and train your personnel how to efficiently operate the machine.

INDUSTRY LEADING WARRANTY

- A nationwide network of trained service technicians supports our 3-year warranty.

An Accu-Cut machine is a one-time investment that will begin to pay for itself as soon as you plug it in.
